Sir,

Thank you for your email. We will now stop all on-going and outstanding work for the server room and security aspects of the building at St Mawgan. On a personal note, from cop Wed I will be on sick leave for a while; I will be picking up emails and answering calls from around 6 Mar onwards, but will not be in a position to travel for approx a month.

IIA766 , IIA767

Please note the email below and immediately cease all on-going and outstanding work for the building and associated security aspects. Any uncertainty please come back to me asap. I remain hopeful that we can divert any funding associated with these tasks for this FY to other work planned, but authorised for next FY, in order that we do not lose the money. I understand that you are already assessing what can be achieved and when this is done I will seek the necessary amended LOI's, noting that we only have a month to get any work done; your assessment must include what has been spent on the building tasks this FY as an indication of what will be diverted to other tasks, ie SLA. I look forward to hearing back from you.

IIA769 , IIA768

Please shout if there are any issues with this course of action regarding the funding, noting that I will seek amended LOI's from Army Res once I receive an assessment from C-A and DIO at St Mawgan of what, if anything, can be achieved. If I hear nothing from you I will assume it is a reasoned approach and continue to spend the funding already transferred, but associated with different tasks; LOI's will confirm annularity against tasks.

Regards,

IIA737

Importance: High

All,

The Op NORTHMOOR FDHC at RAF St MAWGAN was discussed last week at a GOLD Group Meeting (Strategic Command Group). IIA773 from MOD ISS Design Directorate came and presented on the matter and released the report that he had written for DSO JFC. In sum his master questions were:

- Does the original requirement still stand in its present form;
- Should there be a redesign of the solution design; and
- Is the present site still the correct one?

Following discussion PM(A) directed that all work on the current FDHC design and installation should stop as the current investigative workload and direction of overall travel for Op NM doesn't now merit the FDHC as originally envisaged. The Investigative team has been directed to ascertain what actually is required so that the new requirement can be discussed and designed under an appropriate governance structure including a project manager.

I believe that it would be prudent to draw together the appropriate stakeholders to formally discuss this and the best way forward. I believe that that would be representatives from D Info and DIO. N5620 can you now re-convene the meeting we were going to have from your side and we can invite IIA737 and IIA770 or I can have separate meetings with D Info and DIO and Army Infra? Happy to be advised on who we should get around the table from all addressees.

Regards,

Rob
