Seems straightforward enough and does the job for me.

Subject: Op Northmoor recommendations - observations please

All

To date we've made 12 recommendations to Op. Northmoor documented & emailed to RMP in two reports by Mark.

What we've not had is a definitive response from RMP to confirm whether they accept or reject each recommendation. (My view is that implementation remains a matter for the OIOC).

To ensure we have a definitive and auditable record of the RMP's response to recommendations I've put together a schedule similar to the SIO case specific recommendations list we've used in the past. I propose sending this as an appendix to any further recommendation reports with an expectation that the RMP complete and return it for each set of recommendations.

Taking the lead from Mark's reports the document lists & references our recommendations. It asks for a definitive response from RMP to confirm acceptance or rejection. If a recommendation is rejected the expectation is that the OIOC Op Northmoor will provide a brief rationale for his decision.

A significant benefit of this system is the saving in hours trying to find the answers on HOLMES..!

A draft of the document is attached. Any observations / suggestions would be appreciated.
