Title

SIO TEAM 1 SECRET POLICY DECISION - S186/01

Policy Text

Decision: Data Recovery

Recovery of [ITS1] data remains an outstanding issue. Previous arrangements and agreements have failed its result in its recovery. I have reiterated my desire and rationale to recover the entire system once it becomes redundant to [N1805], ACDS J1 at DSF and he has elected not to agree to this COA under the aspires of what appears to be fear @ the security of the data. Granted [ITS1] will contain data/information that is not relevant to Op NORTHMOOR or to the AFG theatre of operations but in order to protect and ensure forensic provenance, it must be recovered in its entirety. [N1805] did not appeared assured by the fact that [redacted] were content with our COA given that those [redacted] have equity in the [ITS1] server. Matter raised to AH Tech (Col MORRIS) in the absence of Gold.

Reason:

The requirement to recover [ITS1] remains unchanged and the rationale has been previously documented. Col MORRIS passed this issue as it is not one that [N1805] would agree on with me. Ultimately, we (undecipherable) the data as we know there is relevant evidence on it. We have perogative powers under S95 (AFA 06) and can lawfully secure and preserve it. Once redundant, there appears to be little justification in DSF refusing to assist.
