Title

TEAM 1 SIO (N50) POLICY DECISION 46 - DSF INTERACTION

Policy Text

Decision:

GOLD has met with [REDACTED] N1466 [REDACTED] and agreed that RMP will be able to copy both the [REDACTED] SFHQ(A) [REDACTED] server and the current server held by that department.

Searches will be able to go ahead of data at that location with suitably cleared staff [REDACTED]. Team 1 are in the process of obtaining [REDACTED] clearance [REDACTED] and will, on clearance being authorised, conduct the manual searches at DSF.

SP3C (Service Police Cyber Crime Centre) will provide the technical advice and recovery of the servers. Copies of the servers, although being recovered by RMP will have to be stored in a appropriately cleared area commensurate with the security classification.

Reason:

The securing and preserving of DSF data / material was always a MLOE (Main line of Enquiry) for this investigation and has been slow to achieve.

Appropriately cleared staff will be able to conduct searches only previously available utilising DSF staff, thereby pondering an independence question over the data being retrieved. SP3C will provide the technical support in order to forensically recover the required material / data in line with their Forensic Data Recovery strategy (which is awaited).

The storage and handling of recovered material needs to be carefully considered with security considerations in mind.

Capt JL WRIGHT
