Title	TEAM 1 SIO (N50) POLICY DECISION 23 - PASSIVE DATA GENERATORS (PDG)
Policy Text	PASSIVE DATA GENERATORS (PDG) - RECOVERY

### Decision:

All relevant passive data is to be secured and preserved that relates to the Operation leading to the detention of the complainant, that detailing the operation itself and that which surrounded the onward detention and interrogation of the complainant. In this case, this could include low level tactical recordings whether by voice (radio comms), helmet/body mounted cameras, any visual recordings whether by ISTAR assets or other means such as interrogation sessions. This list is not exhaustive.

### Reason:

Any material that either visually or otherwise records the events surrounding and including the incident under report may prove vital evidence in pursuit of the investigation. Operational theatres provide unique circumstances which are not usually encountered in the Firm Base, eg use of ISTAR and the employment of interrogations. By securing and preserving this evidence, this will allow subsequent viewing which may lead to the identification of further LOE's and possibly identification of either suspects or witnesses.
