Title	SIO POLICY DECISION 55 - DATA CAPTURE
Policy Text	SECURE AND PRESERVE EVIDENCE - DATA CAPTURE

Decision:

Meeting to be held with [Company Name 1] in order to discuss potential design and requirements for a system suitable for handling and forensically providing a product that may be used within the investigation. SP3C will lead but I must be able to have input into its function and output. Meeting TBA but WO2 PRIDDIN to keep me apprised of progress for arrangements

Reason:

A forensic data handling capability exists with IHAT and I would seek to have a system which is broadly similar in ability that will allow for the storage, interpretation and analysis of huge amounts of data which in some cases may be duplicated many times from differing sources. Whilst I as the SIO do not need to concern myself with the precise technical detailing, I must be able to inform any potential build what it is the investigation will require in terms of a useable evidential product.
